AKONA

CLEANVEY

CLEAN IN PLACE SOLUTION

Introducing our state-of-the-art Cleanvey clean in place (CIP) solution, engineered to make cleaning easier, faster, and repeatable. This all new product offering has all the quality and performance you expect from Cablevey Conveyors.

EASY TO SET UP & USE

Connect to new & exisiting Cablevey systems in minutes with quick disconnect fittings.* Monitor & regulate mixtures by entering percentages and the system does the calculations for you.

REDUCE DOWNTIME

Monitor water flow and temperatures along with creating data logs to track cleaning history, such as cleaner used, temperature, date and length of cleaning.

VERSATILE

Cleanvey is easy to move between equipment and can store information for up to 10 systems with multiple recipes for each system. Manual wash also provides the flexibility to use in other cleaning processes.

CLEAN MORE

The Cleanvey Solution can hold 4 five gallon jugs of chemicals so you have what you need at all times. The integrated blower reduces drying time by 75%.**

* Exisiting Cablevey Conveyors require a new turnaround cover to use with Cleanvey
** As measured in Labratory Testing

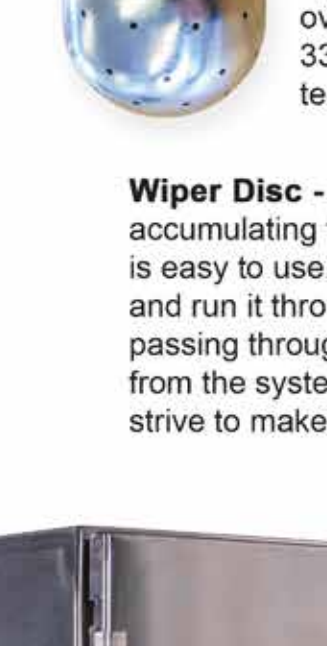
AKONA

CABLEVEY CLEAN

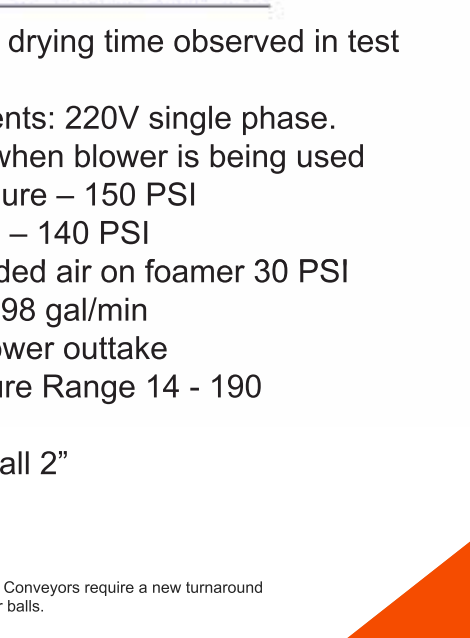
Cablevey Conveyors are designed to be the sanitary solution for your conveying needs. All conveyors are designed to be cleaned without any disassembly needed, meaning less downtime. We never stop engineering and are always looking for ways to increase your productivity while keeping your product safe for your customers. Additional ways we do that are Air Knifes, Brush Boxes, and Sponge Discs. All are designed to meet or exceed your sanitary standards and keep your system running at peak performance.

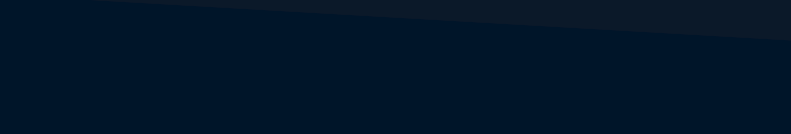


MORE WAYS TO CLEAN

Sprayball - We have designed our systems to be cleaned quickly and easily, decreasing down time and increasing productivity. The optional sprayball decreases cleaning time by reaching those places that had to be cleaned manually before. A sprayball blasts each disc as they pass by with your cleaning solution to remove left-over product and prepare the system for the next productuion run. Constructed out of 3316L Stainless Steel and quick disconnect Triclamps, the Sprayballs can be retrofitted to any Cablevey system, protecting your investment.

Wiper Disc - The Urethane Wiper disc is perfect for wiping away accumulating fines and particles in your Cablevey system and is easy to use. Simply slide it onto the cable in front of a disc and run it through the system. The disc acts as a squeegee passing through the tubes of the system and removing them from the system without having to do a full clean. Our engineers strive to make all cleaning tasks easier, safer, and faster.





CLEANVEY TECH SPECS

- 75% reduction in drying time observed in test systems
- Power requirements: 220V single phase. Max amps 15.5 when blower is being used
- Max Water pressure – 150 PSI
- Max Air pressure – 140 PSI
- Max Recommended air on foamer 30 PSI
- Max water flow 198 gal/min
- Hepa filter on blower outtake
- Water Temperature Range 14 - 190 Degrees F
- TriClamp fittings all 2”

* Exisiting Cablevey Conveyors require a new turnaround cover to use sprayer balls.
