Simple. Effective. Clean.

The V Cone Blender is a simple tumble mixer designed to quickly blend materials. The V shape design allows the blender to rotate on its axis to achieve even and consistent mixtures without the use of internal moving parts. This design prevents the accumulation of product over time, which can be a costly and time-consuming issue to address.

- Sanitary design featuring food-grade materials
- Optional extended cone for thorough blending
- Optional intensifiers to break things up quickly
- Guards and barriers for operator safety
- Minimized vibration using sand ports in stand
- Comparable price point for higher quality
- Customizable design to meet application-specific requirements
- Chopper options to blend and disperse in same machine
